X SERIES NARROW AISLE REACH TRUCK

EFFICIENT
DURABLE
ERGONOMICAL

HFC
HANGCHA
CANADA

hcforkliftamerica.com

CAPACITY 3,000 TO 4,500 LBS

EFFICIENT TRUCKS

The 3,000-4,500 lbs electric forklift with a pantograph is suitable for operations in narrow aisles and limited spaces. Featuring a high lift, big load capacity and small turning radius, as well as advanced performance, easy operations, high safety and reliability, etc., it is an ideal tool for materials handling in warehouses, supermarkets or workshops.

Appearance

Streamlined surface modelling, a smooth profile of the beautiful and generous truck.

Stability

- With the battery placed at the bottom of the chassis, the truck has good stability.
- With four-pivot structure, the truck has good stability when performing a high lift.

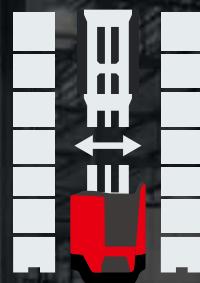

load capacities

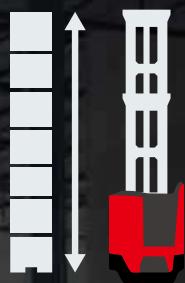

reliability & safety

103.2"

Aisle width

421"

Max. Lift height

High Efficiency

- Thanks to the small turning radius, the truck can operate in narrow aisles.
- A high-power pump motor is used. The silent gear pump (CONCENTRIC) improve the lifting and lowering speed, as well as its operating efficiency.
- With several power modes, the truck is adapted to different operating conditions.
- The brake energy regeneration system provides long working time.

Comfort

The hanging pedal greatly improves the ride comfort and alleviates the operator's fatigue due to long-time driving.

The control handle and backrest can be adjusted according to the operator's habits.

The low pedal enable the operator to get on and off the truck more conveniently and comfortably.

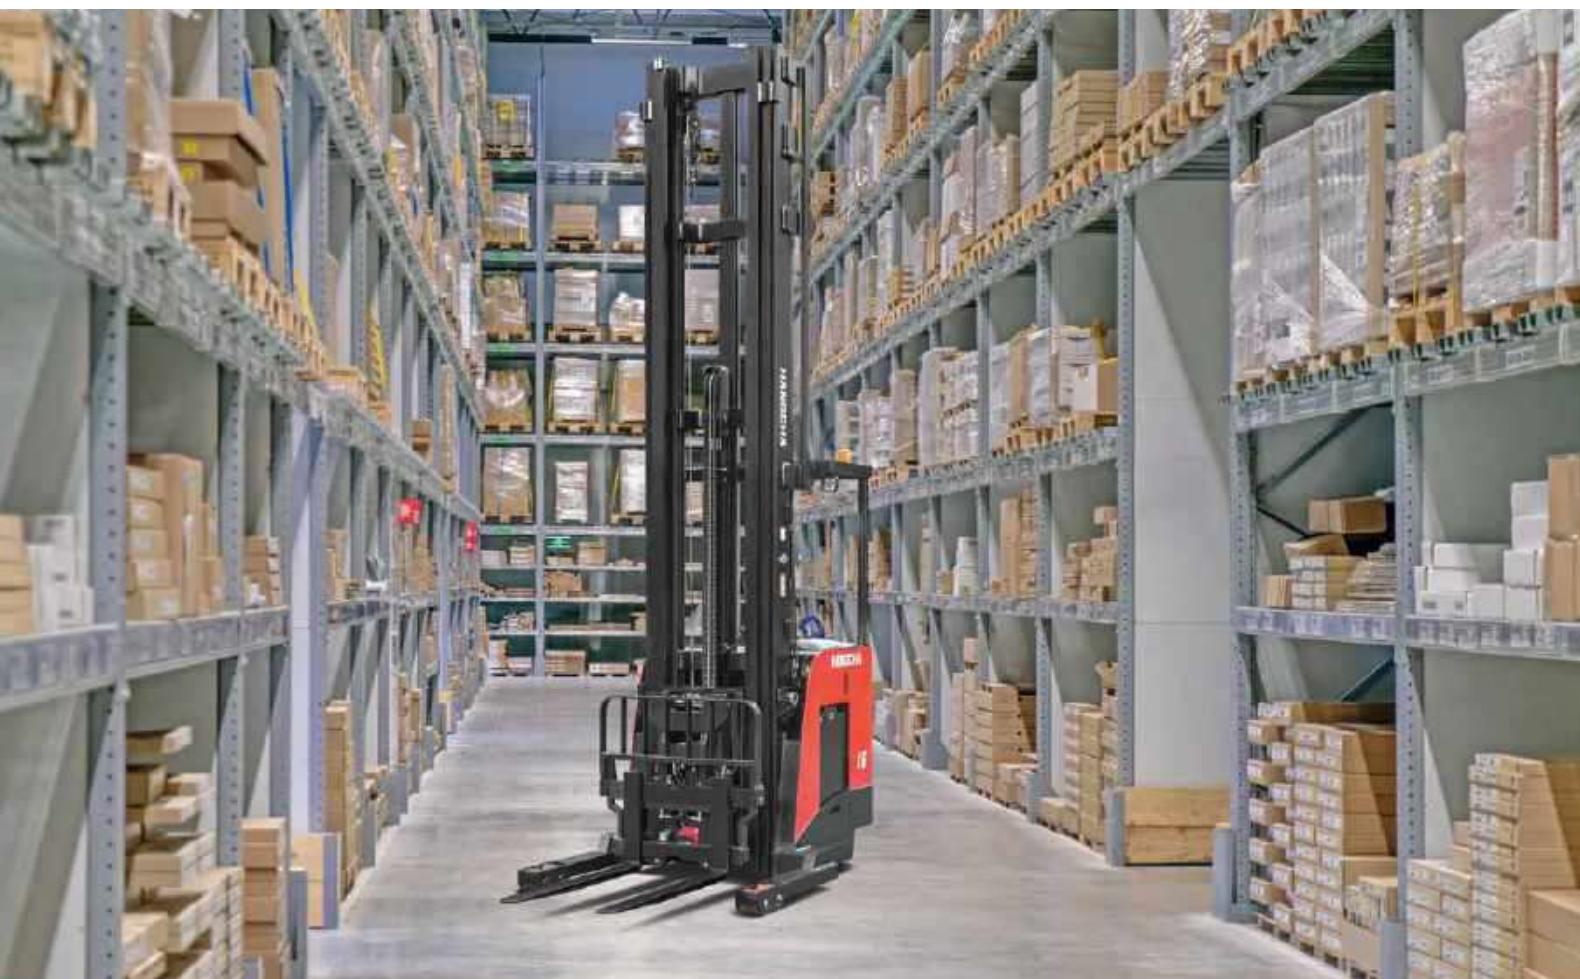

The ergonomically arranged handle, backrest, instruments and switches make operations more comfortable and flexible.

A new optimized lifting system enables the operator's wider view through the mast and excellent line of sight.

The lateral removal of the battery provides easier maintenance and is applicable to continuous operating conditions.

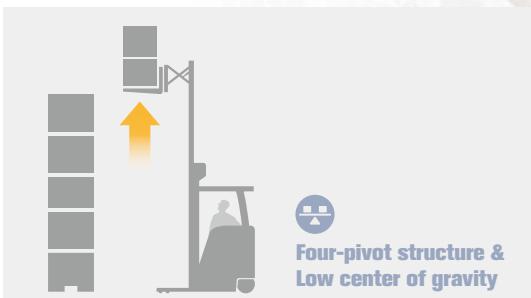

Reliability and Safety

- The four-pivot structure, low center of gravity and high strength of the main force-bearing components of the frame are appropriate to heavy load conditions.
- The main electrical components such as the controller, contactor, power plug and emergency cut-off switch are all products of well-known brands.
- ZF transmission\ SCHABMULLER drive motor and the efficient AC power system can greatly improved reliability and service life.
- The interlocked control of the steering angle, lifting height and travelling speed enables safer operations.

The multifunction control handle's unique shape and angle design helps minimize hand movements and muscle fatigue.

 Four-pivot structure & Low center of gravity

The two safety pedals can effectively reduce the risk from the maloperation.

The optimized design of the wide-view mast enables the operator to get a better view, and improves the operation safety.

Maintenance

- The brushless AC motor is maintenance-free and significantly reduces the maintenance cost.
- The fully open door enables easy repair, maintenance and tuning.
- The battery removed from side of the truck enables easy repair and maintenance.
- The controller and electrical components are placed together and highly integrated.

Advancement

- Instead of a traditional handbrake, EPB (Electric Parking Brake) is used to realize the intelligent braking.
- The high lifting and lowering speeds provides high efficiency.
- The suspension system and hanging pedals improve operating comfort.
- The integrated mechanical, electrical and hydraulic control realizes the step less speed regulation of the truck travelling and the fork movement, more precisely and stably.
- With efficient and precise adjustment performance, the newly equipped AC control system supports longer working time.

High
Efficiency

The large-screen LCD display with fault self-diagnosis functions can accurately display information in harsh environments.

Standard specification

- / AC motor and controller
- / Multi-function instrument
- / EPS (Electric Power Steering) system
- / 198" (5.03m) wide-view triplex mast
- / Fork tilting
- / Load backrest
- / Overhead guard
- / Soft landing system
- / Safe operating system
- / Automatic decelerate speed at the corner
- / Speed automatic limit when mast high lifting
- / Damper pedal
- / Adjustable backrest and armrest
- / Battery side roll out
- / Multi-task control handle
- / Electro-hydraulic proportional valve system
- / Polyurethane tire
- / Headlights
- / Folder
- / Emergency cut-off switch
- / Electric horn
- / Static strap
- / EPB (Eletric Parking Brake)

Options

- / Charger
- / Big capacity battery
- / Other length forks
- / Shield of mast
- / Widened or heightened load backrest
- / Sideshifter
- / Strobe light
- / Blue light
- / Rear working light
- / Cabin ceiling light
- / Overhead fan
- / Camera system
- / 12V power plug
- / Freezer
- / Fire extinguisher
